

Liberal Arts IT Knowledge Base

Liberal Arts IT Mission Statement

Liberal Arts Information Technology (Liberal Arts IT) supports and serves the faculty, staff and students with their computing and technology needs. College IT professionals are engaged in providing a stable state of the art IT environment within the framework of the larger A&M University IT infrastructure. College IT professionals partner with administration, faculty, staff and students to maximize success in the attainment of their goals.

Texas A&M University Information Technology (TAMU IT) provides a vast array of computing resources, facilities, and support to Texas A&M University as a whole, as well as to the Texas A&M System agencies located in College Station. This includes such items as connectivity to the Internet, email services (Exchange and Google), campus firewall and high level security, account management, and the like.

Liberal Arts IT leverages the services of TAMU IT to enhance the user experience for the faculty and staff within the College of Liberal Arts.

Common general areas of assistance may be selected from the **Page Tree** at the left. To search for specific topics, please use the search function:

Need assistance?

Liberal Arts IT professional staff are located throughout the College of Liberal Arts. We serve college staff, faculty, and students during normal business hours.
